

AMENDMENTS TO THE SPECIFICATION

Please delete the paragraph beginning on page 1, line 1 and ending on page 1, line 1.

Please insert the following paragraph on page 1, line 5:

BACKGROUND OF THE INVENTION

Please insert the following paragraph on page 2, line 20:

SUMMARY OF THE INVENTION

Please insert the following paragraph on page 3, line 15:

BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWINGS

Please insert the following paragraph on page 3, line 31:

DETAILED DESCRIPTION OF THE INVENTION

Please insert the following paragraphs on new page 9:

ABSTRACT OF THE DISCLOSURE

The present invention relates to a component carrier which includes a frame and a sealing lip. The frame includes walls defining an internal opening. The frame may be made of metal and the sealing lip of thermoplastic elastomer. The sealing lip is a single piece which is applied to the frame by injection molding or spraying. The frame may further include recesses or openings along the walls defining its cavity. The cooling thermoplastic elastomer may then grip or adhere to the walls so as to retain its shape. The current invention provides increased compensation tolerances for components accommodated therein.
